Bombardier Learjet 60 - all variants

CRS began supporting Bombardier/Learjet aircraft operators with the acquisition of a part out Lear 23 in 1982. We have acquired aircraft on a regular basis in the decades since, and through strategic investment in those aircraft and other inventory sources, CRS continues to lead the way in nose to tail inventory for Learjet Models 35,36,40,45,55 and 60 series aircraft.

We work with Learjet operators to ensure their aircraft are ready to fly by using our extensive experience to support repair needs, both planned and unexpected.

Gulfstream - Challenger - Falcon - Hawker - Lear - Beechjet - Astra - Global Express
